PROFESSIONAL SUMMARY

Cloud and MLOps Engineer with experience designing and deploying production AI systems on AWS and Kubernetes. Strong background in Terraform, containerized deployments, Python, model serving, LLM infrastructure, and scalable backend systems. Focused on building reliable cloud platforms for AI automation, agentic workflows, and production-grade machine learning workloads.

PROFESSIONAL EXPERIENCE

GlobalLogic (client: Ring, an Amazon company)

June 2026 – Present

Senior Software Engineer

Remote

- Building AI agents that accelerate internal product and engineering workflows at Ring for PMs, TPMs, and engineers.

Corteza.ai

January 2026 – May 2026

Senior Machine Learning Engineer

Remote

- Architected production AI infrastructure on AWS using Terraform and Kubernetes, supporting ML and LLM workloads across EKS, ECR, EC2, S3, EFS, and Route 53.
- Built Terraform-managed AMIs that cut Kubernetes pod startup time from ~5 to 2 minutes by minimizing container image pulls.
- Migrated a production assistant from RabbitMQ-based processing to streaming inference with vLLM, increasing concurrent responses from 2 to 10 on a single GPU instance.

Corteza.ai

September 2024 – January 2026

Machine Learning Engineer

Remote

- Led end-to-end fine-tuning workflows for internal LLMs, including codebase scraping, dataset creation, training preparation, supervised fine-tuning, and evaluation.
- Developed Python inference workflows for LLMs, object detection models, diffusion models, and third-party generative AI APIs.
- Built and deployed containerized AI services integrated with production applications and internal ML tooling.

Tecnológico de Monterrey

January 2024 – June 2024

Adjunct Professor

Estado de México, Mexico

- Taught application development, programming, and electronics, mentoring students through hands-on micro:bit projects.

TELUS International

February 2020 – June 2022

Data Analyst

Remote

- Analyzed and annotated digital content to improve training data quality for AI, search, and recommendation systems.

SKILLS

Cloud & Infrastructure: AWS, Azure, Linux, EKS, ECR, EC2, S3, EFS, Route 53, CloudWatch

DevOps & IaC: Terraform, AWS CDK, Kubernetes, Docker, Git, CI/CD, containerized deployments

AI/ML & MLOps: PyTorch, TensorFlow, Scikit-learn, LLMs, vLLM, model training, fine-tuning, model serving, model deployment

Programming & Data: Python, TypeScript, FastAPI, REST APIs, SQL, Pandas, NumPy, PySpark

Languages: Spanish (native), English (fluent), German (intermediate)

CERTIFICATIONS

- | | |
|--|--------------------|
| • AWS Certified Generative AI Developer – Professional | Valid through 2029 |
| • AWS Certified Machine Learning Engineer – Associate | Valid through 2029 |
| • AWS Certified Solutions Architect – Associate | Valid through 2027 |
| • HashiCorp Certified: Terraform Associate (004) | Valid through 2028 |
| • Microsoft Certified: Azure Data Scientist Associate | Valid through 2027 |

EDUCATION

Tecnológico de Monterrey

August 2022 – June 2024

Master of Science in Engineering Sciences

Estado de México, Mexico

- Co-authored an IEEE paper (2023) on a NARMA-L2 neural-network controller as an educational tool for data-driven control.

Tecnológico de Monterrey

August 2017 – December 2021

Bachelor of Science in Mechatronics Engineering

Estado de México, Mexico
